STREETSHOE FINISHER

Remove Equipment

Please ensure that all sports equipment, temporary sports tape lines, tables, chairs, scoreboards etc are removed from the sports floor surface and stored away in alternate areas before the arrival of Shoreline Sports Floor staff. Dividing curtains also need to be raised well above head height. Your facility maintenance has been carefully scheduled on a date that suits both parties and it is imperative that our trained staff are concentrating solely on the specialised maintenance of your asset during the nominated working day.

Remove Chewing Gum and Tapes

Large contaminants such as chewing gum, lollies, temporary sports tape adhesive marks, black scuff marks etc **cannot be removed via rotary abrade, tack mopping or even an automatic chemical scrub.** It is paramount that these foreign items are removed from the sports floor in the days prior to the scheduled maintenance works. Heavy taint such as chewing gum should be removed by Facility Staff with a paint scrapper and then any remaining contaminate wiped away with a rag soaked with Green Earth Velocity cleaner or a similar cleaning product. Black scuff marks should also be wiped away with a rag soaked with Green Earth Velocity. The removal of significant surface taint by Facility Staff prior to the arrival of Shoreline employees, will establish a platform that allows our trained staff to create the ultimate outcome for your sports floor system.

Complete a Good General Clean

Please complete a suitable sports floor surface clean on the afternoon before the scheduled maintenance works. A scissor broom or static mop should be used to remove any grit from the timber sports floor and a general tack mop or treatment with an automatic scrubbing machine should take place prior to Shoreline's arrival on the day of the maintenance. A clean sports floor surface is essential.

Shoreline Sports Floors provides the above pre-maintenance recommendations to all clients in the interest of obtaining the optimum outcome for your facilities timber sports floor asset. A positive client experience prior to, during and post maintenance works is very important to us, please call our office on (02) 4340 0770 with any queries.
